Trigger: Google Forms

Create a Google Form to collect feedback from course participants. The form should include:

- Name
- Email
- Course Rating (1-5)
- Review

Action 1: Classify Text Using AI

Use AI to analyze the feedback provided in the “Review” field. The AI will classify the feedback as positive, neutral, or negative based on the sentiment and key themes in the text.

Action 2: Google Sheets

Automatically log the feedback data (Name, Email, Course Rating, and Review) into a Google Sheet.

Action 3: Discord Notification

Send a notification to a designated Discord channel, informing your team of a new course feedback submission. It should include: customer's name, email, and review.

Step 4.1: Split Automation into Two Main Paths Based on Rating

Path A: Reviews with a rating below 4 stars (ratings of 3, 2, or 1).

Path B: Reviews with a rating above 3 stars (ratings of 4 or 5).

Step 4.2: Further Split Each Main Path into Two Sub-Paths Based on Sentiment

For Path A (Below 4 Stars):

- Path C: If the feedback is negative (e.g., rating of 1-2 stars or AI detects negative sentiment).
- Path D: If the feedback is neutral (e.g., rating of 3 stars or AI detects neutral sentiment).

For Path B (Above 3 Stars):

- Path E: If the feedback is neutral (e.g., rating of 4 stars but AI detects neutral sentiment).
- Path F: If the feedback is positive (e.g., rating of 5 stars or AI detects highly positive sentiment).

Step 4.3: Create Personalized Emails for Each Path

Path C (Negative Review - Below 4 stars):

- Send an apology email, acknowledging the negative feedback and offering assistance.

Path D (Neutral Review - Below 4 stars):

- Send a polite thank-you email, asking for any specific suggestions for improvement to make the course better.

Path E (Neutral Review - Above 3 stars):

- Send a thank-you email, acknowledging the feedback and asking for suggestions on how to improve the course.

Path F (Positive Review - Above 3 stars):

- Send a thank-you email, requesting the customer to share their positive experience on public platforms.
